

A CLEARER WAY TO LIVE WITH TECHNOLOGY

Complex technology. Remarkably simple living.

30 North is a boutique residential technology design and integration firm for exceptional homes. Led by Tim Duffy and backed by more than three decades of experience, we make connected systems feel effortless, intuitive, and at home in the spaces they serve.

THE RESULT

One trusted perspective. A home that works beautifully together. A relationship that continues long after installation.

WHAT WE DO

Every system, considered as one home.

We work with homeowners, architects, designers, builders, and estate teams to plan, integrate, and support the technology behind daily life.

01 / PLAN

Thoughtful from the start

Technology planning, infrastructure, and coordination with the design and construction team help preserve the architecture and avoid compromises later.

02 / INTEGRATE

Everything works together

Lighting, audio and video, home theater, networking, climate, security, surveillance, gate access, outdoor entertainment, and pool and spa systems are considered as a whole.

03 / CARE

A partner beyond installation

Direct accountability, ongoing support, and a service relationship help the home keep working as needs and technology change.

WHY 30 NORTH

Three decades of judgment.
Design-first thinking.
Personal accountability.

Tim helps clients choose what belongs in the home, makes complex systems easier to use, and stays a familiar point of contact when the project is complete.
